

Telescopic-Universal-Jack THZ 14/1200 A

teleskopisch transmission jack, running on the floor side- and lengthwise, suitable for lifting HGV's/Buses at the axle or frame resp. for removal of aggregates (e.g. transmissions)

**description:**

**Telescopic-Universal-Transmission Jack**

- double telescopic cylinder
- pneumatic high-speed control "up" in unladen condition
- pneumatic forced ram retraction of cylinder (deadman control)
- load lifting automatically via touch-foot control of air motor, thereby hands free for working
- easily accessible release valve (rapid ram approach/forced ram return)
- freely movable spring-loaded carriage "FF" with easy-running poly-rollers thereby the jack can be easily moved side- and lengthwise inside the pit up to a load of 1.000 kg, with a higher load than 1.000 kg the carriage blocks automatically and ensures safe lifting,
- carriage size 1.000 mm long x 800 mm wide
- incl. service-unit

**technical details:**

Capacity	14.500 kg
Lifting height max.	2.090 mm
Stroke	1.200 mm
Overall height	890 mm
Overall width-/ length	800x1.000 mm
Air supply	10 bar
Carriage	"FF" freel
Weight	357 kg
